

Power BI Task 10

1) About Data Chosen:

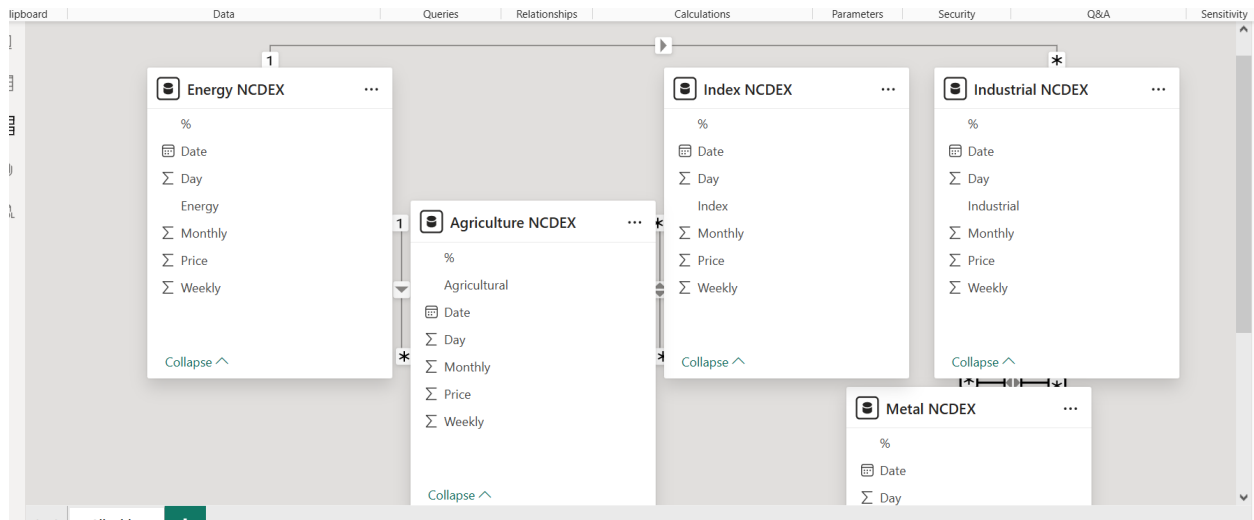

- They give 3 live data set in this coding challenge.
- I selected National Commodity data.
- Because this set only have lot of data & missing values.
- It will help to learn lot and practice many things.

2) Data Cleaning Steps:

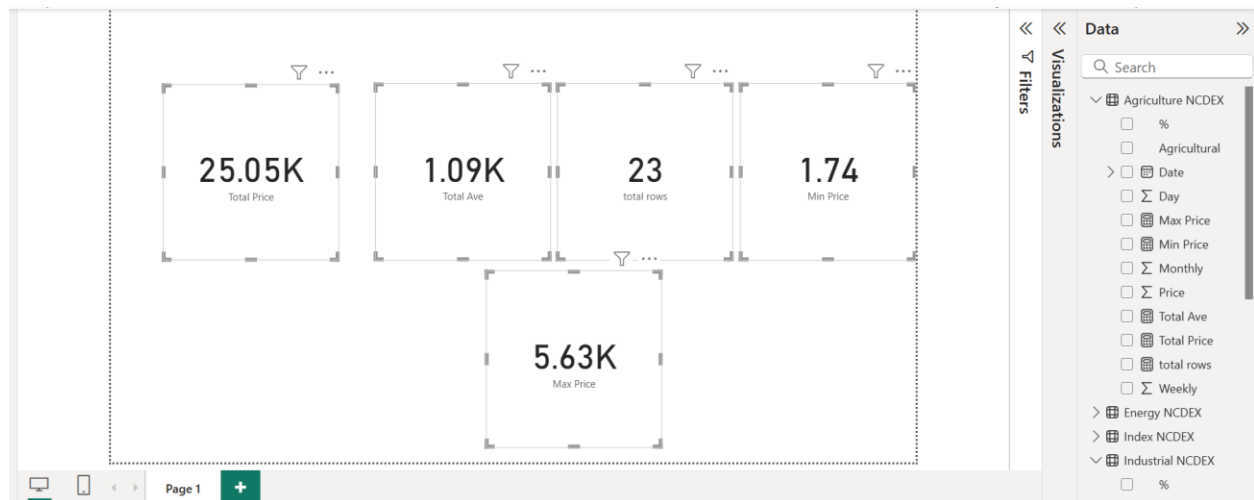

- Promoted headers.
- Data type Changed.
- Filtered Rows.
- Removed duplicates.

3) Data Model:

☐ From: table (column) ↑	Relationship	To: table (column)	Status	
☐ Agriculture NCDEX (%)		Energy NCDEX (%)	Active	...
☐ Agriculture NCDEX (%)		Index NCDEX (%)	Active	...
☐ Industrial NCDEX (%)		Energy NCDEX (%)	Active	...
☐ Metal NCDEX (%)		Industrial NCDEX (%)	Active	...

4) DAX Measures Created:

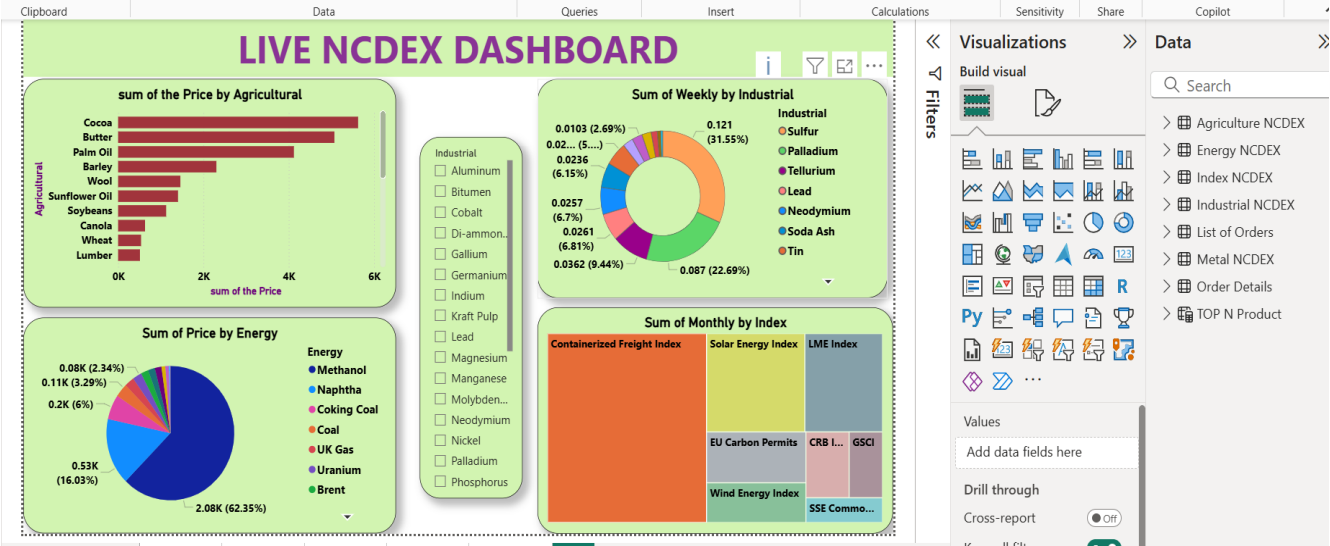

5) insights:

- Compare to Agricultural product, Metal & Industrial products growth increased.
- Most of the income will come from Energy, Metal, & Industrial.
- So, if government want more income means will help to develop this Factors.
- At the same time food industry also must so, try to develop that also.

FINAL DELIVERABLES:

- Power BI file can't Uploaded.
- Dashboard also can't Published because I didn't have business mail id.
- This Documentation will Upload into GitHub.

DASHBOARD

Thank You Sir
